Forecast for Monday 08 Nov 2021

Weather: Cloudy with patchy mainly light rain through the early hours. Then a cloudy morning with rain becoming more persistent, and perhaps occasionally heavy, for a time in the late morning. Rain soon clears in the afternoon with some brighter spells developing before cloud increases again through the evening with further rain expected towards midnight.

Chance of cloud free mountain/hill tops above 700m: Little chance through the morning improving to 40% in the afternoon. Chances fall again in evening.

Visibility: Periods or persistent cloud 300 to 450m through the morning becoming occasional or periods above 600m for the afternoon. Otherwise visibility several kilometres in morning and evening rain, otherwise good.

Meteorologist's View

Gusts on ridges and higher summits reaching 55mph during the afternoon and evening.

Forecast for Tuesday 09 Nov 2021

Weather: Cloudy overnight and the first half of the morning with outbreaks of rain, then dry with long sunny spells developing for the afternoon. Mainly dry through the evening with clear spells.

Maximum wind: Westerly or southwesterly 30-35mph, gusts 50mph over ridges and higher summits, easing 20mph by dawn.

Chance of cloud free mountain/hill tops above 700m: Little chance at first but rising close to 100% by late morning.

Visibility: Periods or persistent cloud 450-600m, with patches below, the cloud lifting and breaking to leave little, if any cloud, below the summits by late morning.

Temperature: **Valleys:** Around plus 10 Celsius at dawn rising to plus 12 or 13 Celsius by day.
At 700m: Plus 6 Celsius.
Freezing level: Above the summits.
